

Planning Guide - Undercounter Appliances

Measurements that are off even slightly can cost you more money and create hassle. We recommend measuring twice before making a purchase.

warnersstellian.com

An appliance returned because it will not fit will incur a delivery fee and possibly a restocking fee. For questions or concerns about dimensions, please contact your sales associate.

Need help measuring? Our in-home premeasuring service is only \$129.99

Double check. Don't double pay.

Use this checklist as a guide to measuring the area.

Measure the height of the space under the counter.

Be sure to measure in each corner.

Front right _____ inches

Front left _____ inches

Back right _____ inches

Back left _____ inches

Measure from the bottom of the countertop to the floor in front of the opening.

This will account for any new flooring that has been installed.

Left _____ inches

Center _____ inches

Right _____ inches

The second measurement you need is the depth of the space.

The purpose is to determine if there are any obstacles blocking the depth of the space, namely plumbing and electrical.

Left _____ inches

Center _____ inches

Right _____ inches

Top front _____ inches

Top back _____ inches

Bottom front _____ inches

Bottom back _____ inches

Take pictures of your current undercounter appliance or the space it will be installed. If possible, please take a photo of the inside of the cabinets.

Measure from the bottom of the countertop to the floor in front of the undercounter appliance.

This will account for any new flooring that has been installed.

Left _____

Center _____

Right _____

More details

Use this section to help you address which type of appliances will work in your kitchen.

Is your undercounter appliance in a corner?

Yes No

Do you have hard surface countertops like granite? These countertops need special installation procedures for the anti-tip brackets.

Yes No

Does your current undercounter appliance have a custom wood panel attached to the door?

If so, it most likely will not fit on a replacement undercounter appliance brackets.

Yes No

For icemakers, is there a sink to pump to or gravity drain underneath?

Yes No

Getting ready for delivery

There are a few things to do before your new undercounter appliance is delivered.

Locate your breaker panel and identify the breaker for the undercounter appliance.

The installer needs to turn off the power to your undercounter appliance during installation.

Locate the water shut-off valve.

In most cases, this is located under the sink and is attached to the hot water line of the faucet. This valve must be shut off prior to installation.

Arrival of your new undercounter appliance
